

ILLUMIO SECURES THE 80% OF DATA CENTER AND CLOUD TRAFFIC THAT THE PERIMETER MISSES.

Only Illumio lets you...

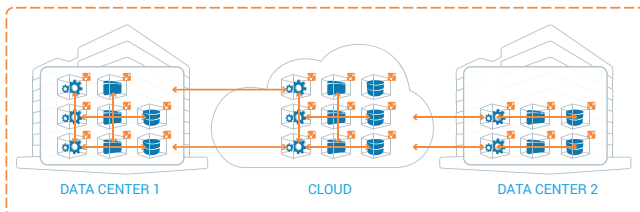

Reduce your attack surface by 99% with nano-segmentation.

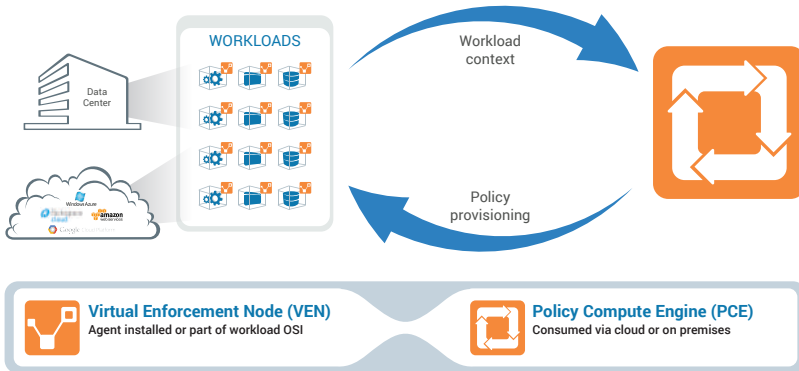

See live application traffic and policy violations.

Take your security anywhere without rewriting security policies.

Instantly protect data in motion with one-click IPsec.

Illumio Adaptive Security Platform (ASP)™

- Decouples security from infrastructure, with no dependency on IP addresses, subnets, VLANs, or zones
- Programs the ideal security policies on every server (VM, bare metal, or container) and process
- Re-computes security policies in real time when servers scale up or down, move, or change
- Extends adaptive security to other data center elements, including load balancers
